# STREAMLINE CARRIER SCHEDULING WITH LOGIBOOK

## AN INTUITIVE, POWERFUL APPOINTMENT MANAGEMENT SOLUTION

**Managing inbound and outbound appointments doesn't have to be a hassle. LogiBook, empowers you and your partners with a seamless, web-based scheduling experience—giving you more control, transparency, and efficiency on your docks.**

## WHY LOGIBOOK?

**Simplifies Scheduling:** Carriers and customers can book appointments online—no more phone tag or overflowing inboxes.

**Real-Time Visibility:** Appointments display directly in your WMS with color-coded statuses (inbound, outbound, started, delayed, etc.).

**Centralized Control:** You decide who can book, cancel, or modify appointments—and when.

**Unlimited Users:** No per-user licensing fees—ideal for 3PLs, brokers, and operations with frequent carrier changes.

**Reduced Bottlenecks:** Custom limits on daily appointments, slot availability, and grace periods help maintain operational flow.

## CARRIER SELF-SCHEDULING

Carriers can securely log in to book appointments online, viewing only the time slots that are currently available.

## ADMIN CONTROLS

Set customized scheduling rules for each warehouse or carrier, including earliest and latest appointments.

## ADVANCED ACCESS MANAGEMENT

Set customized scheduling rules for each warehouse or carrier, including earliest and latest appointments.

## REAL-TIME NOTIFICATIONS

Trigger alerts for carrier arrivals, departures, and real-time status updates like on-time or late arrivals.

## ADMIN CONTROLS

Set customized scheduling rules for each warehouse or carrier, including earliest and latest appointments.
